The original texture, was Feeling & Colour of the material itself decorate... the wall surface Luxurious

SK AESTHETIC COAT is a new type of decorative finishing system. With the specially and uniquely developed technique and special coating materials, it easily reproduces the beauty and texture of the material itself created by artisan's expertise.

The full water-based system (matt finish) from the undercoat to the topcoat both for interior and exterior by the roller application provides excellent workability and safety.

SK AESTHETIC COAT

Features

HCOH emission class

Washability

Mould and algae resistance

Suitable substrates

Gypsum boards, calcium silicate boards, concrete, cement mortar, extruded cement boards, PC members, various types of boards, old paint films, etc.

Japanesque

Solemn and noble Japanese beauty

■ For interior / New construction and renovation

	Process	Material	Dilution ratio (wt.%)	Consumption (kg/m²)	No. of coat	Interval(hrs)			
						In process	Between processes	Final curing	Remarks
Sur	Remove dirt or dust thoroughly, and make good unevenness, irregularities and scratches. Dry the surface thoroughly to bring moisture content to a maximum of 10% and pH to 10 or less. [New construction] For the uneven surface of gypsum boards and the dented surface due to screw, prepare the surface with putty and make it as smooth as possible. [Renovation] In case of peeling, lifting and gaps of the wallpaper, repair it by pasting, etc.								-
1	Undercoat **2	HP SEALER	Pre-mixed	0.10-0.13 **1	1	-	2 or more	_	Wool roller, Brush
•	Base coat	SK AESTHETIC COAT BASE	100	0.13-0.15 **1	*5 1	_	2 or more	_	Wool roller, Brush
2		Water	5-15	-					
3	*3,4 Pattern coat	SK AESTHETIC COAT FOUNDATION	100	0.03-0.05 **1	1	_	2 or more	(24 or more)	Special roller Special sponge
		Water	50-100	_					
(4)	Touch-up	Check the condition of the surface. In case of uneven finish, touch up with base colour or foundation colour using foundation roller and special sponge.				-	_	24 or more	Special roller Special sponge

Metallic finish *Metallic finish is only for interior. For metallic finish, please contact the nearest sales office for the details.

(23°C)

3		Water	50-100	-					
(4)	Touch-up	Check the condition of the surface. In case of uneven finish, touch up with base colour or foundation colour using foundation roller and special sponge.					24 or more	Special roller Special sponge	
	*6 Topcoat	SK AESTHETIC COAT SI CLEAR MATT	100	0.13-0.15	1	-	-	24 or more	Airless spray gun Discharge: 400-600ml/min
		Water	5-15	-					Pattern width : 25-30cm

- 1. The consumption varies depending on the application conditions. The theoretical volume (without wastage) shall be 0.08-0.10kg/m² for undercoat, 0.11-0.13kg/m² for base coat, and 0.03-0.05kg/m² for pattern coat. Use the consumption when calculating the required quantity of each material.
- 2. Choose an appropriate undercoat depending upon the conditions and type of a substrate.
- 3. Arrange the test application and get the approval of the pattern from an architect and general contractor prior to the actual application.
- 4. For the narrow space and the area where it is hard to create patterns such as uneven substrate, use a special sponge for touch-up.
- 5. If the substrate is seen through clearly, apply extra materials. In that case, be careful that the total consumption shall be 0.15 kg/m2 or less.
- 6. Basically, a clear topcoat shall be applied with spray. In case the roller application is required depending on the conditions, use a non-bubble roller (short nap) and be careful not to make the uneven gloss.

Packing Style

Material	Packing style
HP SEALER	20ltr/can
BIOFINE SEALER	20ltr/can
SK AESTHETIC COAT BASE	20ltr/can, 5ltr/can
SK AESTHETIC COAT FOUNDATION	4ltr/can, 1ltr/can
FINE METALLIC W	15kg/can
SK AESTHETIC COAT SI CLEAR FOUNDATION	15kg/can

Hazards Information and Safety Precautions

Handle a product in accordance with SDS (Safety Data Sheet). Be careful about the safety control when conducting application work.

STANDARD COLOURS
